

REBUILDING I-93 SALEM TO MANCHESTER

INCIDENT MANAGEMENT IMPROVING MOBILITY AND SAVING LIVES

The primary goals of the Incident Management Program are:

- Quickly detecting incidents
- Relaying information to the public
- Restoring normal traffic flow as soon as possible
- Providing for multi-agency collaboration
- Complying with NH Quick Clearance laws

Benefits of the program include:

- Reduced vehicle delays
- Enhanced safety to motorists
- Reduction of secondary incident frequency
- Improved response and clearance times

The NHDOT has made significant progress in implementing the Incident Management Program:

- Created an internal DOT Working Group
- Created a Task Force comprised of local officials
- Is coordinating with local and state emergency responders
- Is developing detours for road closures resulting from roadway accidents

Across the Nation, Incident Management programs have delivered significant and measurable results.
